Adil Yergaliyev

iOS Engineer · 9 years of native iOS · Swift, SwiftUI, UIKit · AI-assisted development

Berlin, Germany | adil.yergaliyev@gmail.com | fromastwithlove | fromastwithlove

Experience

iOS Engineer, Freenow by Lyft – Berlin, Germany — Jan 2026 – present

- B2B & Health domain

iOS Developer, pixolus GmbH – Cologne, Germany — Oct 2017 – Dec 2025

pixometer team, the company's main product: mobile meter reading for the energy industry

- Built the iOS app for automated reading of electricity, gas, water and heat meters
- Integrated pixometerSDK for barcode scanning and camera-based meter reading recognition
- Implemented offline mode with automatic backend sync for areas without connectivity
- Built map navigation that guides meter readers to each meter location
- Automated the CI/CD pipeline, including TestFlight deployment and screenshot generation
- Covered the app's core flows with unit and UI test suites
- Also shipped: pixometer self, MeterCollect Ableser-App

iOS Developer, pixolus GmbH – Cologne, Germany — Jan 2020 – Jan 2023

Research project **eVIDENCE**: energy consumption digitalization

- Built a government-funded SwiftUI app in cooperation with STRABAG AG
- Implemented electricity and fuel consumption measurement with data export

iOS Developer, pixolus GmbH – Cologne, Germany — Oct 2017 – Feb 2020

Research project **KOMEET**: patient data management for intensive care units

- Built the iOS app with Core Data offline storage, encrypted sync and a native-JavaScript bridge
- Integrated leserSDK to capture vital signs from non-connected medical devices via the camera
- Designed modular interfaces for integrating multiple hospital systems, online and offline

iOS Developer, Naimi.kz – Astana, Kazakhstan — June 2016 – Aug 2016

- Refactored the home services marketplace app from MVC to VIPER in Swift and managed its App Store deployment

Education

Rhein-Waal University of Applied Sciences, *MSc in Information Engineering and Computer Science* – Kamp-Lintfort, Germany — Sept 2016 – Mar 2022

Thesis "Continuous security testing for an existing client-server application"

Suleyman Demirel University, *BSc in Computing Systems and Software* – Almaty, Kazakhstan — Sept 2012 – June 2016

Skills

iOS: Swift, Objective-C, SwiftUI, UIKit, Combine, RxSwift, Core Data, SwiftData

Quality & delivery: XCTest, UI testing, Fastlane, CI/CD, DevSecOps

AI workflows: Cursor, Claude Code, MCP, agent-driven implementation, testing and code review

Other: React, JavaScript, Python

Languages: Kazakh (native), Russian (native), English (fluent), German (professional working proficiency), Turkish (limited proficiency)

Interests: Swimming, Bouldering, Snowboarding, Traveling, Cyber Security, Home Automation
